

## Covid-19 (coronavirus) – A quick guide for Parents / Carers:

What to do if....	Action needed by parent / carer	Return to school when
 My child has Covid-19 (coronavirus) symptoms	<ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Child should get a test</li> <li>Child / household self-isolates while waiting for test results</li> <li>Inform school immediately about test results</li> </ul>	When the child's test comes back negative and symptom free for 48 hours
 My child tests positive for coronavirus	<ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Child self-isolates for at least 10 days from when symptoms started (or from day of test if no symptoms)</li> <li>Inform school immediately about test results</li> <li>Whole household self-isolates for 14 days from day when symptoms started (or from days of test if no symptoms), even if someone tests negative during those 14 days</li> </ul>	<p>When the child feels better, and has been without a fever for at least 48 hours</p> <p>Note: They can return to school after 10 days even if they have a cough or loss of smell / taste. These symptoms can last for several weeks once the infection has gone</p>
 Someone in my household has Covid -19 (coronavirus) symptoms	<ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Household member with symptoms should get a test</li> <li>Whole household self-isolates while waiting for the test result</li> <li>Inform school immediately about test results</li> </ul>	When the household member test is negative, and the child does not have Covid-19 (coronavirus) symptoms
 Someone in my household has tested positive for Covid-19 (coronavirus)	<ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Whole household self-isolates for 14 days from day when symptoms started (or from day of test if no symptoms), even if someone tests negative during those 14 days</li> </ul>	When the child has completed 14 days of self-isolation, even if they test negative during the 14 days
 NHS Test & Trace has identified my child as a 'close contact' of somebody with symptoms, or confirmed Covid-19 (coronavirus) case	<ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Child self-isolates for 14 days (as advised by NHS Test &amp; Trace), even if they test negative during those 14 days</li> <li>Rest of household does not need to self-isolate, unless they are a 'close contact' too</li> </ul>	When the child has completed 14 days of self-isolation, even if they test negative during the 14 days
 We / my child has travelled and has to self-isolate as part of a period of quarantine	<ul style="list-style-type: none"> <li>Do not take unauthorised leave in term time</li> <li>Consider quarantine requirements and FCO advice when booking travel</li> <li>Provide information to school as per attendance policy</li> </ul> <p>Returning from a destination when quarantine is needed:</p> <ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Whole household self-isolates for 14 days, even if they test negative during the 14 days</li> </ul>	When the quarantine period of 14 days has been completed for the child, even if they test negative during those 14 days
 We have received advice from a medical / official source that my child must resume shielding	<ul style="list-style-type: none"> <li>Child should not attend school</li> <li>Contact school as advised by attendance team / pastoral team (Head of Year)</li> <li>Child should shield until you are informed that restrictions are lifted and shielding is paused again</li> </ul>	When school / other agencies inform you that restrictions have been lifted and your child can return to school again
 I am not sure who should get a test for Covid-19 (coronavirus)	<ul style="list-style-type: none"> <li>Only people with symptoms need to get a test</li> <li>People without symptoms are not advised to get a test, even if they are a 'close contact' of someone who tests positive</li> </ul>	When conditions above, as matching your situations, are met

Symptoms include at least one of: a high temperature; a new continuous cough; a loss of or change to your sense of smell or taste. See more at:
