

<p><b>Possible Lesson Breakdown:</b>                  Lesson 1 – Middle East Location                  Lesson 2 – Plate Movement                  Lesson 3 – Climate                  Lesson 4 – Population                  Lesson 5 – Global Importance <b>Knowledge Test</b>                  Lesson 6 – UAE                  Lesson 7 – Yemen <b>Extended Writing Individual Feedback</b>                  Lesson 8 – Conflict <b>End of Unit Knowledge test</b></p>		<p><b>Unit Knowledge (key terms in bold)</b></p> <ul style="list-style-type: none"> <li>• The <b>location</b> of the Middle East and it's <b>geographical significance</b>.</li> <li>• The <b>physical geography</b> of the Middle East</li> <li>• The <b>climate</b> of the Middle East and the influence this has on <b>population distribution</b> of the region.</li> <li>• The climate of the Middle East and the variation of climate across the region.</li> <li>• <b>Population distribution</b> across the Middle East linked to <b>ethnicity</b> and <b>physical geography</b>.</li> <li>• The <b>global importance</b> of the Middle East and it's major <b>economic activities</b> including it's oil industries.</li> <li>• The development of the United Arab Emirates and how it has <b>diversified</b> it's economy.</li> <li>• The impact of <b>conflict</b> on development in the Middle East (Yemen)</li> </ul>	<p><b>Writing Tasks</b></p> <p>How has conflict prevented development in Yemen?</p> <hr/> <p><b>Reading Tasks</b></p> <p>The Middles East oil industry</p>
<p><b>Assessment:</b>                  Lesson 5 Knowledge Test                  Lesson 11 Knowledge Test</p>	<p><b>Feedback</b>                  Lesson 7 Individual feedback</p>	<p><b>Geographical Skills</b></p> <ul style="list-style-type: none"> <li>• Using aerial photographs</li> <li>• Using maps on a range of scales</li> <li>• Interpreting data to make decisions</li> <li>• describing human and physical landscapes (landforms, natural vegetation, land-use and settlement) and geographical phenomena from photographs</li> </ul>	<p><b>CEIAG</b></p> <ul style="list-style-type: none"> <li>• Use of different forms of maps</li> <li>• Use of satellite imagery</li> <li>• Using data to make decisions</li> <li>• Influence of resources and resource management on economic wellbeing</li> <li>• How engineering practices impact social and economic wellbeing</li> </ul> <hr/> <p><b>Career industry/ sector link</b>                  Environment and agriculture Economics                  Politics Engineering</p>

**5 Year Plan Outline**

**Notes**  
This topic is a region study of The Middle East in western Asia. Students should gain an understanding of the geography of the region and how this has influenced its human geography. Students should gain an understanding of resource variability and how this can be influenced by several factors as well as the impact of limited resources on people. This unit should be linked as much as possible to current world events e.g. Oil prices, Palestine, Yemen conflict.

<p><b>Key Knowledge Themes:</b>  <b>People and where they live:</b> The human geography of The Middle East  <b>Resources and their management:</b> The distribution of resources across The Middle East region and their impact on people/wealth.  <b>Global Economic Development:</b> Differences in wealth in The Middle East and causes of a development gap in the region.  <b>Place knowledge:</b> The physical and human features of The Middle East.  <b>A connected world:</b> Global resource demand and humanitarian aid.</p>
<p><b>Links to Prior Learning:</b>  <b>Resource and their management: 7.3 Urbanisation in India:</b> Students have an understanding of resource availability linked to economic development.  <b>Global Economic Development:</b> Students have gained a good understanding between the differences between rich, poor and developing countries, the impact of resources on development and the development of some countries in The Middle East.  <b>Place knowledge:</b> Students have a good understanding of the physical geography of this region from unit 8.3.</p>
<p><b>National Curriculum Links:</b>  <b>Locational Knowledge:</b> Locational knowledge and deepen understanding of The Middle East, focusing on environmental regions, key physical and human characteristics, countries, and major cities.  <b>Place knowledge:</b> understand geographical similarities, differences and links between places through the study of human and physical geography of a region within Asia.  <b>Human geography</b> relating to the use of natural resources</p>
